

I can NOT live without Videophone, and Video Relay service. I CAN live without TTY relay service. As you might know Sorenson's practice and long wait for next availability of interpreter. What impressed me with all of these VRS operators that they don't restrict on how many VP, nor restrict who I can get free VP from. Since I was able to get both VP, I was able to call any of these 8 VRS without any long wait. Its not that I endorse Sorenson's practice. But, we need to comply with patent laws, and that Sorenson have two patents within their product. So, fair enough for me.
